They are two separate issues. The rush pertaining to the drawings is complete, but the problem with the IDS needs to be resolved. You can address this issue in the exact same manner as the other rush minus the Xrush document. I know that's a little convoluted, so feel free to give me a call for clarification if it's needed. Thanks.

Hello,

The rush sheet in eDan regarding this application has a rush message regarding correction of drawings and a response message already written in and initialed. Your email discusses initials required for the IDS. I do see the IDS that needs initials, however the Printer Rush sheet in eDan involves a separate issue (correction of drawings). How should I proceed?
